Customized Training in your City

Hosting Seminars/Workshops

There are several ways agencies request or host our training in their cities. Whether it be a customized Auto Theft and Fraud seminar, “*Auto Theft in the 21st Century*”, or the “*Fast and the Fraudulent*” workshop.

Option 1:

We will provide 4 to 8 hours of training at a location of your choice. Depending on travel distance our fee is \$2,000 plus expenses (expenses include, airfare, hotel, transportation, and meals).

Option 2:

We will set up training in your city with a minimum guarantee of 30 people for a 4 or 8 hour seminar/workshop. Attendees will pay Bender Enterprises Inc. an agreed upon per person charge for the workshop (this price varies based on venue location which is generally \$125.00). If the attendance falls short of the 30 person minimum, then the requesting agency picks up the difference in compensation. The requesting agency will assist in venue location and “getting the word out”. Attendees can register 3 ways: they can register on our site, by phone, or mail the registration form in to us; or they can send in a PO to us. (Additional fees may apply depending on the distance from the airport to the chosen venue; or if held outside of the United States).

Option 3:

For a set fee of \$5,000.00 we will conduct training in your city. This fee includes instructor’s fees and all expenses, which include, but are not limited to, the cost of additional speakers, data acquisition from manufacturers, airfare, hotel, car and meals for all instructors.

The hosting agency can set any per person cost they desire or they can base it on our minimum fee. For example if 100 people attend and the hosting agency charged \$50.00 per person, they would receive \$5,000. To add an additional day(s) of training the fee is cut in half for each additional day. (Additional fees may apply depending on the distance from the airport to the chosen venue; or if held outside of the United States).

The hosting agency would provide the location, advertising, amenities for the students (lunch is optional if there are nearby restaurants) and some audio-visual support (we provide the computer, (and projector and sound if needed for small rooms). We can provide flyers that the hosting agency can distribute if desired. We will forward a handout for the hosting agency to copy and distribute.

Once the date is firm we will post the information on our website along with a flyer. In addition to the hosting agencies advertising, we will advertise this class to our email subscribers if they wish. We like to encourage hosting agencies to offer "Seminar Scholarships" for those who cannot afford the cost of the seminar, and for the States' top auto theft investigator" or "top patrol officer". With "Seminar Scholarships" the awarded attendees cost is zero.

Go to www.VINtrack.com/training.htm for more information on the subject matter.

The training is generally provided by Mike Bender, an internationally recognized expert in advanced vehicle theft identification, detection, prevention and investigation.
CV available upon request.
